

Patient Details

Name: Vaishali Chhangani

Age: 45 Gender: Female

Treatment Recommendations:

- Allergy Management:** Address and manage any allergic reactions.
- Antibiotic Therapy:** Initiate appropriate antibiotics to treat pneumonia.
- Supportive Care:** Provide fluids and monitor respiratory status.

Possible Causes:

- Bacterial Infection:** Common bacterial agents could lead to pneumonia.
- Fungal Infection:** Consider fungal pathogens in immunocompromised patients.
- Viral Infection:** Pneumonia may be caused by viral pathogens.

Recommended Blood Tests:

- Blood Cultures:** Identify any bacterial pathogens present in the blood.
- C-Reactive Protein (CRP):** Measure inflammation levels in the body.
- Complete Blood Count (CBC):** Assess for signs of infection and inflammation.

Prescriptions:

- Amoxicillin:** Common first-line antibiotic for bacterial pneumonia.
- Azithromycin:** Alternative antibiotic for atypical pneumonia.
- Prednisone:** Corticosteroid to reduce inflammation if needed.
