

## Patient Details

Name: sdf dsf

Age: 3      Gender: Male

## Treatment Recommendations:

- Radiation Therapy:** Evaluate the need for adjuvant radiation therapy post-surgery to reduce recurrence risk.
- Rehabilitation:** Implement rehabilitation services for recovery from stroke effects.
- Surgical Intervention:** Consider resection of the meningioma due to its severe nature and location.

## Possible Causes:

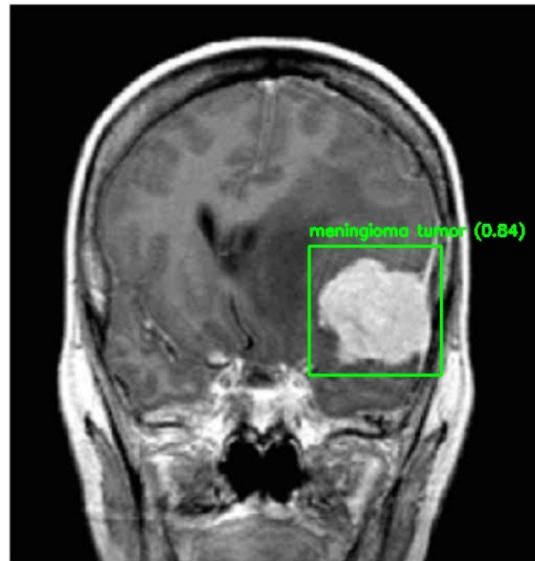

- Environmental Factors:** Exposure to radiation or certain chemicals could be contributing factors.
- Genetic Predisposition:** Family history of brain tumors may increase risk.
- Previous Head Trauma:** History of head injuries may lead to the development of meningiomas.

## Recommended Blood Tests:

- Coagulation Profile:** Evaluate blood clotting ability, especially post-stroke.
- Complete Blood Count (CBC):** Assess overall health and detect infections or anemia.
- Tumor Markers:** Check for specific markers that may indicate presence of brain tumors.

## Prescriptions:

- Anticoagulants:** To prevent further strokes and manage blood clots.
- Antiepileptic Drugs:** To prevent seizures which may result from brain lesions.
- Pain Relievers:** To manage post-surgical pain and discomfort.

## Detected Features:

**tumor 1:** Area = 2.51 mm<sup>2</sup>, Size = 33.26mm x 32.47mm, Shape = elongated (horizontal), Location = middle right
